

YOUR HEALTH IS THE ENGINE THAT PUSHES US FORWARD

Who are we?

We are a team of occupational health and safety professionals who in 2018 managed to make SEAT the first automotive company in Spain and in the entire Volkswagen Group to achieve ISO 45001 certification and certification as a Healthy Company.

We have designed, developed and implemented unique and pioneering project initiatives such as CARS.

We have also formed the SEAT Healthy Company scientific committee, which aims to generate health and safety know-how and includes scientists from Harvard University, Hospital Germans Trias i Pujol, Hospital Clínic and Hospital Vall d'Hebron, among others.

Our daily work consists of looking after the thing that matters most to us: our health.

What is our mission?

To enhance productivity

We help Volkswagen Group companies in Spain to be leaders in productivity in their respective activities by achieving and continuing to improve healthy working environments.

To attract and retain talent

We try to ensure that Volkswagen Group companies in Spain are viewed as the most attractive employers in their sectors in order to attract and retain the brightest professionals offering optimal customer service.

To strengthen a sense of belonging

We want employees of Volkswagen Group companies in Spain to feel motivated, committed and identified with their company and their work.

Why?

Passion and dedication

We are a group of seasoned professionals who are passionate about the daily challenge of making our companies healthier every day. The success of our projects for Volkswagen Group companies in Spain is our best calling card.

Know-how and professionalism

We have the know-how that comes from more than 70 years of dedication to occupational health and safety. We love to continue evolving every day and our restless spirit leads us to conduct research and collaborate with national and international bodies and universities in order to generate new know-how through our scientific committee.

United to be stronger

We want all Volkswagen Group companies to share the same commitment and passion for healthier environments, and we are passionate about challenges.

Obtain more competitive prices

Working together helps us to achieve lower unit costs in contracting services that would not be possible to obtain in isolation. Strategically, it is not the same to negotiate for 150 people as it is for 25,000.

Profitability

According to the World Economic Forum, investing in the health of workers leads to a ROI of 2.4%. Data from SEAT studies indicates that absenteeism is reduced by 2.5-4% and medical costs by up to 5.9%.

Respond to a social need

The reduced capacity of public health systems to respond to the health problems of our workers is forcing us to take action to become more competitive. Having the full working capacity of a healthy and active workforce throughout their working lives is a key factor for success.

Improve as a company

Investing in the health of workers makes you better as a company, generates synergies, maintains financial resources and know-how within the group, and reinforces the feeling of belonging to the same team.

How do we do it?

Legal compliance: core business

HEALTH

Health monitoring

Health promotion

Medical care

SAFETY

Safety at work

Industrial hygiene

Ergonomics

Psychosociology

EMERGENCIES

Integral emergency management
